

ISO 14001 - Environmental Management Systems

The ISO 14001 certificate guarantees that your organization has an environmental management system and thus manages the environmental aspects relating to its operations in a structured manner, which includes compliance with environmental laws.

If you have questions about the certification status of a company, feel free to contact us at certification@vincotte.be.

Your tailor-made solution

For the certification of an environmental management system, our experts conduct an audit on the correct implementation and the efficiency of this system. We do this by verifying the documentation and by conducting interviews in the various concerned departments of your company.

Your result

Our certificate is a world-wide recognition for your organisation that your environmental management system has been correctly implemented as per ISO 14001:2015, and has also been kept up-to-date.

Please note

Legislations

All the regional, federal and European environmental laws applicable to the certified company

Norms and Standards

ISO EN NBN 14001:2015 - Environmental Management Systems - Requirements with guidelines for use
Vincotte is accredited by BELAC (BE-V-0016 EMS) for the certification of environmental management systems as per ISO 14001

In which situation?

This service is beneficial to every company, partnership, firm, undertaking, authority or institution, or a part or combination thereof, whether or not recognised as a legal entity, whether public or private, which has its own functions and its own administration.
