

Self-checking guide in the phytopharmaceutical production and distribution sector (G-010) (**)

Since 1st January 2005, all operators have been subject to compulsory self-appraisal, traceability and notification. Observing these three pillars is your guarantee that products marketed are safe.

Are you aware of all of the legal rules applicable to production and distribution of phytopharmaceuticals? Do you use the procedures and keep the records required by the G-010 sector guide on safety, quality and traceability?

If you have questions about the certification status of a company, feel free to contact us at agrifood@vincotte.be.

Your tailor-made solution

Vincotte will assess your self-appraisal system in the phytopharmaceutical production and distribution sector. Vincotte is a certifying body accredited by the AFSCA (Agence Fédérale pour la Sécurité de la Chaîne Alimentaire) [Federal Agency for Safety in the Feed Chain] for the G010 self-appraisal guide.

Depending on what you do, our qualified inspectors will assess your system, your practices, your infrastructure and your equipment.

Your result

After the audit:

- You will receive an assessment of your quality system from an independent body.
- You will obtain a detailed report.
- Your company meets the requirements of the phytopharmaceutical production and distribution sector.
- You will receive a discount on payments made to the AFSCA (if all conditions are met)

Please note

- AR 14/11/2003_Self-Appraisal
- AR 24 02 1994_Conservation, marketing and use of pesticide for agricultural use
- AR 28 02 1994_Accreditation of companies in manufacturing and importing, exporting or packaging of pesticide for agricultural use
- RE 1272/2008_Classification, labelling and packaging of chemicals and their mixtures
