

Stability inspections and technical expertises

Does your structure comply with the applicable standards? Vinçotte operates as an independent partner, tapping into its expertise and many years of experience to assess the stability of your structure.

Your tailor-made solution

Our experts undertake an impartial inspection of your structure's stability to check if it complies with the applicable standards. All the plans produced are examined by the research office, including:

- designs
- calculations booklets
- specifications
- technical data sheets
- site operations
- provisional and final handover

These stability inspections and technical expertise activities are applicable to:

- buildings
- infrastructure work (bridges, tunnels, quay walls, locks, water basins, water purification stations, sewer systems,...)
- industrial complexes
- metal structures

Your result

Thanks to this service you will be provided with a report showing the extent to which your structure complies with the applicable regulations. It also undertakes an analysis of any problems there may be and makes proposals about how to overcome them.

Please note

- Royal Decrees
- **General Regulations on Protection at Work** and the Code on Well-being in the Workplace
- **General Regulations on Electrical Installations**
- Regional and Municipal Regulations

Norms and standards

- **Belgian and European standards**, including standards in the series NBN EN 1990 to 1999 (**Eurocodes**) and the series NBN B
- Single Technical Specifications **STS**
- Technical information **WTCB**, **OCW** and **ATG**
- Technical requirements **ETAG** and **PTV**
- Specific specifications

In which situation?

This service is mainly requested by prime contractors (with plans for a structure, with an existing structure, ...)
