Validation statement - 2017

“Green Origin¹”

On behalf of AIR LIQUIDE Vinçotte performed a claim validation of liquid hydrogen labeled “Green Origin¹” and sold by AIR LIQUIDE in 2017.

Validation procedure

The validation was performed by Vinçotte in accordance with the methodology and procedures set out in the Claim Protocol Validation Report² and the Verification Protocol Report³. The Claim Protocol and the Verification Protocol were developed according to the ISO 14020:2000 “Environmental labels and declarations – General principles” and ISO 14021:2001 “Environmental labels and declarations - Self-declared environmental claims (Type II environmental labelling)”.

Declaration of independence

The validation was carried out by Vinçotte as an independent third party.

Conclusion

Based on the work undertaken it is the conclusion of Vinçotte that not all direct CO₂-emissions coming from the energy consumption for production to delivery (purification, liquefaction, storage, filling, transport and delivery) of liquid H₂ labelled “Green Origin” and sold by AIR LIQUIDE in 2017 were compensated by purchasing the equivalent amount of renewable energy in the Benelux. This was unintentional and because Vinçotte received from Air Liquide a written statement noting additional compensation will be carried out in 2018 to cover for the missing purchase of renewable energy in 2017.

Vilvoorde,
16/08/2018

¹ No CO₂-emissions coming from energy consumption from production to delivery (purification, liquefaction, storage, filling, transport and delivery)

² Vinçotte nv, ref. 00060453522_ECO-CLAIM15001.001

³ Vinçotte nv, ref. 00060453522_ECO-CLAIM15001.002

Brussel,

Betreft : Verklaring Air Liquide mbt GO aankopen voor Green Origin claim

Omwille van foutieve data in de verkoopcijfers voor LOX (vloeibare zuurstof) in de maand april 2017, is er een fout geslopen in het aantal door Air Liquide aan te kopen GO's.

Concreet werd er een onvoldoende hoeveelheid GO certificaten voor $6295 - 3139 = 3156$ MWh aangekocht.

Air Liquide verklaart dat de ontbrekende hoeveelheid GO certificaten voor 3156 MWh met betrekking tot kalenderjaar 2017, nog dit jaar in 2018 wordt rechtgezet.
Dit betekent dat er voor kalenderjaar 2018 extra gecompenseerd moet worden.

Met vriendelijke groeten

Mario Van Roy
